EXECUTIVE SUMMARY

The Shire of Dalwallinu recognises the importance of sport and recreation to the Shire's residents. The Shire and the community play an important role in the provision of sport and recreation opportunities which are part of our social fabric and provide enjoyment and generate community cohesion.

This plan has been developed to establish a ten (10) year plan to help the Shire and the community determine a strategic direction for the future planning, provision and management of sport and recreation.

Consultation has shown the key factors that will influence sport and recreation development over the next ten years revolve around the development and delivery of support services to clubs, associations and community groups.

Key findings from consultation are as follows

- The current population of the Shire of Dalwallinu is estimated at 1,429 (Census 2016) with a median age of 38, and is expected to remain steady.
- There is a shift from participation in organised sport to a desire to participate in less structured active and passive recreation.
- The Shire is the major provider of sport and recreation facilities.
- The benefits of physical activity from a health and well being perspective are recognised by all levels of government.
- There is a need to develop a shared community vision for sport and recreation.
- Changing work and leisure patterns affect participation rates in sport and recreation and the types of activities undertaken.
- The community is becoming more diverse with changing expectations.
- Community facilities are dispersed and cater for relatively small catchment populations.
- Community hubs or meeting places play an important role in community development.
- Joint use and multi-purpose community facilities provide innovative solutions to local provision challenges.
- The natural environment is an untapped recreation resource that requires sound management practices.
- There is the potential for stronger links between sport and recreation and other aspects of community such as youth, seniors, tourism, education and economic, social and environmental development.
- The Shire alone cannot provide all facilities, services and programs. There is a need to build partnerships and foster innovation and self-management to meet desired outcomes.

Sport and recreation opportunities contribute to the health and wellbeing of individuals and communities. Dalwallinu residents should be provided with opportunities to participate and have access to a wide range of sport and recreation activities.

The Sport and Recreation Plan provides a coordinated and strategic approach to sport and recreation facility development and planning, based on identified community need and ensures that a range of sport and recreation development, training and funding programs and services are provided to the community.

These programs and services will be aimed at supporting sport and recreation groups with a view to increasing the capacity of these groups to more effectively and efficiently manage their organisations. The plan enables the Shire to achieve the following objectives:

- Encourage effective and efficient administration of sport, recreation and community groups.
- Promote opportunities for groups to access funding through various sport and recreation funding programs.
- Facilitate other development opportunities for sport and recreation groups within the Shire.
- Improve the sustainability of sport and recreation organisations by providing greater support to volunteers.

OVERVIEW OF THE SHIRE

The Shire of Dalwallinu is located approximately 254kms from Perth CBD and covers an area of some 7,224 square kilometres.

There are five gazetted townships in the Shire, Dalwallinu (where the Shire offices are located), Kalannie 54km to the East, Wubin 20km to the north of Dalwallinu, Buntine 16km north of Wubin and Pithara 13kms south of Dalwallinu.

The Shire of Dalwallinu borders the Shires of Yalgoo, Perenjori, Wongan - Ballidu, Koorda, Moora and Coorow.

There are approximately 1,040 current rateable lots within the Shire.

Population

Census data of Population from the Australian Bureau of Statistics 2016 Census records show that the population for Dalwallinu in 2016 was 1,429. This was a 12.87% increase on the 2011 Census figures.

	Population	Median Age
Shire of Dalwallinu	1,429	38
Buntine	62	48
Dalwallinu	788	34
Kalannie	188	38
Pithara	110	42
Wubin	103	45
Marne	11	36
Xantippe	20	46
Nugadong	15	50
Jibberding	50	34
Goodlands	49	44
Miamoon	15	31
Petrudor	7	54
East Damboring	11	56

	Population	% of Population
0-14	292	20.4%
15-29	243	17.0%
30-49	380	26.6%
50-69	364	25.5%
70+	150	10.5%

ROLE OF COUNCIL

The Council, through appropriate resources such as the Shire's Chief Executive Officer, Development Services Department, Works & Services Department and Community Support Officer undertakes the following functions in relation to sport and recreation in the Shire of Dalwallinu:

- Identify, understand and respond to the sport and recreation needs of the Shire.
- Ensure that the Shire's sport and recreation facilities are well maintained and managed to a high standard.
- Identify opportunities to promote participation in sport and recreation activities.
- Encourage participation by local residents in a diverse range of sport and recreational activities.
- Create opportunities for partnerships between the Shire, other levels of government, the sport and recreation sector and the wider community in the pursuit of high quality sport and recreation outcomes for the Shire of Dalwallinu.
- Advocate and source funds on behalf of the Shire of Dalwallinu for improved sport and recreation services, programs and facilities.
- Build the capacity of sport and recreation clubs in the Shire of Dalwallinu with respect to administration, management and fund raising functions.

ROLE OF THE PLAN

The role of the Shire of Dalwallinu Sport and Recreation Plan is to assist the Shire in continuing to provide quality sport and recreation services and facilities to the local community.

This plan will be used in conjunction with other Plans and planning documents including the Strategic Community Plan and the Shire of Dalwallinu Disability Access and Inclusion Plan 2018 to 2022.

The Sport and Recreation Plan provides estimated costs for future proposed expenditure subject to Council approval and successful grant funding and contributions by the groups.

PURPOSE OF THE PLAN

The Shire of Dalwallinu Sport and Recreation Plan provides information about the role of the Council in supporting and advocating for the needs of the local community, sporting groups and other community organisations with respect to sport and recreation.

This plan identifies the Shire's vision for the delivery of sport and recreation services that will guide the Shire.

The Shire has a leadership role in ensuring that local residents have access to high quality sport and recreation services and facilities and this plan will assist the Shire in providing access to a range of sport and recreation opportunities that contribute to the ongoing health and wellbeing of all residents of the Shire of Dalwallinu.

VISION

Our vision is:

Social and economic stability and well planned sustainable towns

A high standard of living, promoting business growth and nurturing agriculture in balance with the environment

A place of opportunity, acceptance of all people, strong health/aged care, educational services and a community favourable to extended families

Our vision will be achieved by:

- **Consolidation of current facilities** - The construction of new sport and recreation facilities should be considered as only one of many strategies to achieve community goals. Making the best use of current facilities and facilitating new programs and services should be considered prior to the construction of new facilities.
- **Multi functional and flexible facilities** - Community facilities should be able to meet the changing needs of the community. The components and nature of activities undertaken within the facility should not be limited to sport and recreation. Consideration should be given to other programs and services such as health, youth, child care, library etc. Opportunities to create multi functional and flexible community hubs should be actively encouraged.
- **Working together through partnerships, team work and collaboration** - Community goals can best be achieved by working together and tapping into a broad range of expertise and resources. There are many untapped resources that can be found at a local level that can be harnessed to achieve quality outcomes. The involvement of external organisations, agencies and commercial providers can also prove to be mutually beneficial. Providing an environment that is conducive to identifying and supporting partnerships is critical.
- **Maintaining a holistic approach to planning** - Sport and recreation is not a distinct, stand-alone component of community development. There are many aspects that have strong links to other areas such as tourism, environmental management, education, health, arts, crafts and heritage. Planning should reflect the need to consider the ‘whole picture’ and avoid isolating one aspect and more importantly look for opportunities to build on great concepts.
- **Being realistic in our endeavours** - Dalwallinu is a small municipality comprising of five dispersed communities. It is unrealistic to expect that a comprehensive range of facilities and services can be provided in each of the communities. Understanding the limitations and setting achievable goals will ensure best use of finite resources.

CLUB AND ASSOCIATION ISSUES

Clubs create more than just opportunities for people to play sport or participate in a recreational pursuit. They provide a chance for people to get together and find support and friendship from likeminded people. This support is what makes Clubs such an important part of the Community and therefore it is important to make sure that the Shire does what we can to help these clubs develop and grow.

The Shire has appointed a Community Support Officer to create an open line of communication with our Clubs/Community Groups and to assist them in building the capacity of the club by attracting volunteers / members, education, facilitation and communication. The Community Support Officer is available to work closely with the clubs/groups, and will hold regular user meetings of the new Dalwallinu Recreation Centre to ensure Clubs are maintaining the new facility and to listen to any of the clubs concerns.

Problems identified through the consultation process with clubs are:

- Many committees are run by long term members of the community and there are fewer young people becoming involved. Long term volunteers are burning out and the sustainability of many clubs is at risk.
- There are no plans in place to guide the future of sport and recreation organisations.
- Very few clubs are budgeting for a profit, they just meet the bottom line every year or dip into cash reserves to survive.
- Most clubs know that grants are available; however, few have members with skills to apply to maximise this income generation option.

Actions Taken

The Shire has let the clubs know about the “Clubs on Line” website provided by the Department of Sport and Recreation and encouraged them to use the resources. This assists clubs with organisational development, governance and provides templates for clubs to use to improve volunteer membership, committee responsibilities and Healthy Club Checklist.

The Economic & Community Development Officer is available to assist clubs/groups with attracting grant funding and assisting with the grant application.

ACTIONS / PROJECTS IDENTIFIED DURING THE CONSULTATION PROCESS

Meetings

Shire staff sought feedback from all clubs via email and attended face to face meetings with some groups.

It is acknowledged that all community needs may not have been identified through the consultation process and the Shire should not rely exclusively on information and data generated for this Plan. The Shire will monitor community needs on a regular basis.

Actions taken

Regular User meetings will be held by the Economic & Community Development Officer throughout the district (at least every six months) to identify any changes to the sporting and recreational club needs.
